

**City and County of San Francisco
Public Utilities Commission**

Manager, Energy Efficiency Development

Filing Deadline: July 1, 2011

The San Francisco Public Utilities Commission Power Enterprise (SFPUC-PE) provides electric power to municipal facilities of the City and County of San Francisco, including power to operate Muni streetcars and electric buses, street and traffic lights, municipal buildings and other City facilities.

We are inviting applications for a Manager, Energy Efficiency Development to assist, develop and implement goals, objectives and priorities of the Power Enterprise. Ideal candidates should possess: a baccalaureate degree in a relevant field from an accredited college or university with five (5) years of professional work experience in planning, development, budgeting, contracting and/or implementation of energy efficiency projects. This experience must include two (2) years serving as technical lead, supervisor or manager of an energy efficiency group.

The Manager in this important and challenging position will supervise a group of professionals dedicated to planning and deploying the most cutting edge energy efficiency technologies for saving energy in city municipal facilities, as well as designing incentive programs for SFPUC-PE's public power customers.

San Francisco is the most livable of American cities with about 800,000 residents. Built on a 49 square-mile peninsula, its unique terrain is bordered on three sides by the ocean and the bay. Exquisitely restored Victorians and modern high-rises crest its seven major hills, and widely diverse lifestyles flourish side by side. The temperature ranges from 50 to 72 degrees year-round. Cultural and outdoor activities abound.

The City offers competitive salaries and benefit package for management employees including flexible spending benefits. The management cafeteria plan may be viewed at http://myhss.org/downloads/forms_guides/2009_2010_GuideMCP.pdf.
